High-end GPON FTTH Home Gateway
and Mesh Wi-Fi Manager

ISKRATEL
S&T Group

Full gigabit throughput

Top-of-the-line wireless performance

Unparalleled reach and coverage

Wi-Fi 6

Innbox G92 home gateway delivers fibre connectivity over a GPON uplink, unlocking the true potential of gigabit connectivity by providing **multi-gigabit wireless** in even the biggest homes. This state-of-the-art home gateway guarantees uncompromised user experience with advanced triple-play services and multiple **ultra-high-definition TV** streams, delivered over wired or wireless home network.

Innbox G92 supports a smooth delivery of services such as internet and video – including multiple UHD TV streams – over **four gigabit Ethernet ports** or over **Wi-Fi 6 802.11ax** access point that operates at **2.4 GHz and 5 GHz** concurrently.

Furthermore, Innbox G92 embeds a management point for a gigabit mesh Wi-Fi network that ends the headaches caused by dead zones. Complemented by Innbox satellite access points, the mesh Wi-Fi network ensures **seamless roaming and smooth handover**, never compromising the supreme user experience.

Adding to connectivity, Innbox G92 offers SIP-compatible VoIP services over FXS ports. One USB host port is available for **value-added features**, such as a printer server, a file server, or an **LTE modem** for backup uplink connectivity.

The devices' embedded firewall, NAT and IP sharing deliver **secure internet access** to all connected users.
